OCTAGON BOX MOUNTED LED DISC LIGHTS

JBR SERIES

The JBR series disc lights have the same look and feel as our popular EUD series and can be installed in a standard octagon box! This makes them especially useful in fire-rated ceilings or other applications where specific hardware is required behind the drywall.

Or as a simple replacement for a keyless socket!

Magnetic trim rings allow the unit to be faced in White (included), Black and Satin Nickel (sold separately).
